GUJRATHI LOKESH

React.js Developer

Shirpur, Maharashtra | +91-7666172302 | lokeshgujarathi0079@gmail.com
LinkedIn | GitHub | Portfolio

SUMMARY

Final-year Computer Science undergraduate with hands-on experience building React.js applications — component architecture, global state management with Redux Toolkit, client-side routing, and REST API integration. Comfortable across Tailwind, Bootstrap 5, and SCSS, and actively building proficiency in Next.js. Strong JavaScript (ES6+) fundamentals, Git-based workflows, and a fast learning curve for new tools.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Java, C, HTML5, CSS3

Frontend: React.js, React Router, Redux Toolkit, Context API, Tailwind CSS, Bootstrap 5, SCSS/SASS

Currently Learning: Next.js (SSR/SSG, file-based routing, API routes)

Tools & Platforms: Git, GitHub, Vite, npm, Vercel

Concepts: Component Architecture, React Hooks, REST API Integration, Responsive Design, Client-side Routing, Asynchronous JavaScript

Soft Skills: Problem Solving, Adaptability, Time Management, Teamwork, Quick Learner

PROJECTS

Myntra Clone — E-commerce Web Application | GitHub

React.js · Redux Toolkit · React Router · JavaScript (ES6+) · Vite · Node.js (custom backend) · CSS

- Built a full e-commerce shopping experience covering product listing, product detail, shopping bag management, and automatic price calculation.
- Architected global state using Redux Toolkit across three slices — item data, shopping bag actions (add/remove), and fetch status — replacing prop drilling with a scalable, centralized store.
- Integrated a custom Node.js backend via REST APIs to serve product data, decoupling the UI from static/hardcoded datasets.
- Implemented client-side routing with React Router and async loading states to handle data-fetch UX cleanly.
- Set up the project on Vite for fast development builds and hot module reloading.

Health Appointment App — Doctor Booking Platform | Live Demo

React.js · React Router · JavaScript (ES6+) · Bootstrap · Vite

- Developed a multi-page appointment booking flow: browse doctors → view profile → book appointment → confirmation.
- Implemented dynamic, parameterized routing with useParams to render individual doctor profiles from a shared dataset, including graceful handling of invalid doctor IDs.
- Used useState and useNavigate to manage form state and multi-step navigation across the booking flow.
- Designed a component-based architecture (Doctors, DoctorDetails, BookAppointment, Header, Footer) for reusability and maintainability.
- Deployed the application on Vercel with a live, publicly accessible demo.

Job Portal & Recipe Finder — Additional Frontend Projects

HTML5 · CSS3 · JavaScript (ES6+) · REST APIs

- Built a responsive job listing/search interface with dynamic client-side filtering, and a recipe search app integrating a public REST API with real-time results — both focused on clean UI/UX and DOM-driven interactivity.

EDUCATION

B.Tech — Computer Science and Engineering Expected 2027

R. C. Patel Institute of Technology, Shirpur, Maharashtra | CGPA: 6.60

HSC (12th): 82% | SSC (10th): 89.80%

ADDITIONAL INFORMATION

Practices Data Structures & Algorithms problems on CodeChef
